

Autodesk® Cloud rendering

Advance the Way You Work with Autodesk® Cloud

Autodesk® Cloud enables you to extend your desktop with computing capacity and capabilities, helping you design, visualize, and simulate your ideas to accelerate innovation and gain a competitive advantage.

Autodesk® Cloud provides powerful rendering capabilities that reduce time and costs by enabling users to produce compelling, photorealistic visualizations in the cloud—without tying up the desktop or requiring specialized rendering hardware.

Key Benefits:

- Improve design visualization with the ability to produce photorealistic images and panoramas.
- Reduce rendering time and increase the number of renderings you can create.
- Continue working on other tasks on your desktop while rendering is processed in the cloud.
- Reduce costs by eliminating the need for expensive, specialized rendering hardware that may be used infrequently.

Availability

Rendering is available to customers with an Autodesk® Subscription to*:

- Autodesk® Design Suite (Premium or Ultimate)
- Autodesk® Building Design Suite (Premium or Ultimate)

Getting Started

To get started with Autodesk® Cloud rendering, go to <http://rendering.cloud.autodesk.com>. Click 'Sign In' to enter your current Autodesk ID and password, or create a new account.

After signing in, upload your files and start rendering in the cloud. If you use Autodesk® Revit® software, download and install the plug-in after signing in at <http://rendering.cloud.autodesk.com>. The plug-in will enable you to access cloud-based rendering from within your Revit software.

* The availability of Autodesk Cloud services varies by language and region and may change over time. Please contact your Autodesk reseller or representative for more information. Cloud services are valid for the duration of the customer's Subscription. All Autodesk Cloud benefits are subject to the terms and conditions accompanying the service.
