Using Hotkeys

Hotkeys map your keyboard to commonly used functions. When you work with Autodesk Backdraft Conform, you can use hotkeys to accelerate navigation in the application, to apply effects to clips, as well as to edit objects and animation channels.

When you create a user from the Project Management menu, the hotkeys for the default user are replicated to your user profile. This guide is a useful resource for looking up those default hotkeys.

This guide is also available in online help. To access online help from anywhere in Backdraft Conform, press **Left Ctrl+=**.

You can also use one of two online methods for looking up hotkeys:

- Press **Alt+Ctrl+F8** to open the Hotkey Editor. The Hotkey Editor displays global hotkeys along with those for the current module. You can also click Hotkeys in the Preference menu to display global and shared hotkeys.
- If auto display of tooltips is enabled in the Preferences menu, hover over the button for which you want to determine the assigned hotkey. If you have disabled the auto display of tooltips, press and hold **Alt+Ctrl+spacebar** and hover over the button. If a hotkey exists for the button, it is displayed in the tooltip.

Using the Hotkey Editor, you can customize hotkeys for your user profile or create new ones. The Hotkey Editor updates automatically to reflect your changes. For instructions on using the Hotkey Editor, see the “Managing hotkeys” chapter in the user's guide.

NOTE Remember that the hotkeys in this guide are the default hotkeys specified for application release. If you modified your default user profile, or if you are working with a custom user profile, some of the hotkeys may be different.

How to Use

This section begins by listing global hotkeys—the hotkeys that work regardless of where you are in the application. This is followed by sections on hotkeys for Backdraft Conform modules in alphabetical order.

NOTE Hotkeys new to this version are indicated by a “New” label to the left of the key or in the section header.

Global Hotkeys

Use the following hotkeys throughout Backdraft Conform.
